Open Water Scuba Course

The Scuba One – PADI beginning Open Water Certification Course consists of three sections: Classroom, Pool, and Open Water. The classroom and pool sessions are offered either on a weekend or in the evenings. We generally meet at Scuba One for class and Mandan Aquatic Center for pool training. Some classes take longer and some less time, depending on student performance. There is no extra charge if the students need more time. With the new Elearning system, you can register right through our web site www.ScubaOne.com, which reduces your classroom time.

The course is sanctioned by PADI (Professional Association of Diving Instructors). We follow PADI standards and use PADI support materials and teaching aids. **Scuba One has been in business since 1982 and is North Dakota's only PADI 5 Star Dive Center.** Scuba One owner and founder, Randy Kraft, is a PADI Master Scuba Instructor, and has worked full time in the dive & travel industries over 35 years.

The PADI Open Water Scuba Course is the single, most popular diving course in the world.

We now offer the classroom portion online. The online course is designed so once it is downloaded, you can use either a regular computer or touch tablet. If you download PADI's app, there is a free online intro course you can download, to get a better understanding of the full course.

To become a PADI Open Water Diver, the student then needs to complete at least 4 open water dives. These dives take a minimum of two days. We offer the open water dives locally in North Dakota, provide a signed referral written into your included log book, which can be presented to another instructor while you are on vacation, or complete the dives on one of our trips to a warmer climate.

When taking the course online, the class/pool fee includes the PADI Divers Log with training record, for the student to keep. **You do NOT need to purchase the optional book packet PADI offers when signing up online, as we include it with the pool training.** While we provide all equipment for the course, we highly recommend the purchase of at least mask, fins, and a snorkel. Our equipment pricing will always be competitive and we will make sure to offer what works is best for you.

Each part of the course is fun and ensures that you learn what you need to enjoy diving to the fullest.

If you should have any questions, don't hesitate to call or email.

Scuba One Inc. also has the finest in travel agency credentials, offering complete tropical vacation travel packages.
